LED COR

RYAN COX - GENERAL CONTRACTOR

COMPANY PROFILE:

In 1947, with the help of a bulldozer loan secured on nothing more than a handshake, William Lede started building supply roads for Imperial Oil's historic discovery well in Leduc, Alberta. With that, Leduc Construction was born. later to be named Ledcor Group.

WHY IT WORKS:

When Protec III: Original chemically activates with the concrete paste it creates a gel that fills the pours of the concrete, keeping it cool and slowing down the set time.

"We love Protec III: Original as a cure for all of our concrete slabs, I recommend it to everyone. The product is easy to apply and very economical, it is nice to see it soak into the concrete, not like some of the other products that leave a mess. We love the curing properties of Protec III: Original. The product is applied right after power troweling, it soaks in nicely, darkens the concrete, the concrete stays dark for a long time, making a great cure. Flooring adhesives have no problem adhering to the concrete that have been treated with Protec III: Original, the beauty of the product is that it cures the concrete while leaving no surface membrane. Because it penetrates the concrete fully, pressure sensitive glues and adhesives work perfect on concrete that has been cured with Protec III: Original. From our many years of experience Protec III cures concrete better than water curing, and at the fraction of the cost, plus we can get a project completed sooner over water curing. In fact, we did a field test on a project with seven engineers, comparing water curing to Protec III: Original on its own. The test was to pour two concrete pads with thermometers imbedded into the concrete, the concrete pads were in the direct sun, one pad water cured and the other pad treated with Protec III. The result was significant, the temperature of the pad treated with Protec III was on average 2 degrees lower than the water cured pad. Protec III was slowing down the cure better than water curing, needless to say we cure everything now with Protec III. Like I said Protec III is a great product, you have a winner here."

Date: April 2019

Location: Saskatoon, Saskatchewan

CON-TECH

GENERAL CONTRACTOR

COMPANY PROFILE:

Con-Tech promotes a team approach where the owner, design team and construction crews work together to complete a quality project on time and on budget.

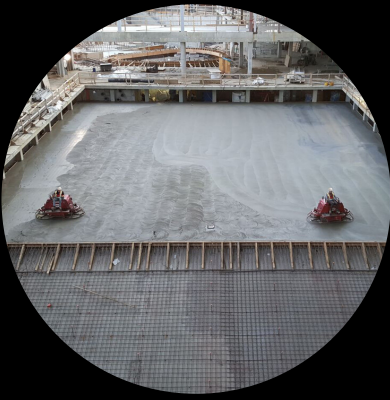

WHY IT WORKS:

We see no advantages to watercuring anymore compared to the Protec III: Original.

"We have been using Protec III: Original for at least 8 years now as a cure for all of our concrete, including office space areas, warehouse floors and exterior concrete sidewalks and aprons. We have treated over 1 million ft² of concrete with no issues. This product has met all of our needs over the years and we are pleased with the results. We are known for doing quality work and with Protec III: Original it fits in perfectly. Historically, where we would have water cured the concrete in the past, we now use Protec III: Original instead, because it works, we see no advantage to water curing anymore compared to using Protec III: Original. Using Protec III does not slow down the project like water curing, it is very inexpensive and easy to use. We have had no problems in areas of flooring where Protec III has been used as a cure. Flooring such as carpet, VCT or vinyl have no problems adhering to the concrete, because Protec III: Original does not leave a membrane when curing. We are very happy with your product."

Date: April 2016

Location: Saskatoon, Saskatchewan

WILLIAMS AND ASSOCIATES

RICK COLE - PLACER AND FINISHER/POWER TROWEL

COMPANY PROFILE:

Williams and Associates is a General Contractor in Calgary, AB and area.

WHY IT WORKS:

Newly poured concrete is protected from physical damage.

"Protec III: Original is a high quality densifier/sealer. I use it on most concrete slabs I do. It hardens the surface to a high degree, so much so, that when we sealed a floor with Protec III: Original it actually wore steel off the corner of a beam that had been dragged across it (newly poured concrete) and it didn't gouge the concrete! Economical way to harden and protect your floor!"

Date: 2015

Location: Calgary, Alberta

MINERS CONSTRUCTION

GENERAL CONTRACTOR

COMPANY PROFILE:

"Con-Tech promotes a team approach where the owner, design team and construction crews work together to complete a quality project on time and on budget."

WHY IT WORKS:

Can use as a Cure on all flatwork, inside and out.

We have been using Protec III: Original on all our design build projects to cure all of our flat work for the past 5 years without issues. It's a great product for curing concrete and leaves a great looking floor."

Date: April 2016

Location: Saskatoon, Saskatchewan

WESTERN FOUNDATIONS

BRIAN - GENERAL CONTRACTOR

COMPANY PROFILE:

We specialize in commercial and residential concrete form work and construction management services, Western Foundations is based out of Medicine Hat, Alberta, however we serve clients across western Canada.

WHY IT WORKS:

Protec III: Original is a good insurance program against wrecked concrete.

"We haven't had any complaints since we started using Protec III: Original and it has been 2 years now. We wanted a better product and we are very particular with what we use. Protec III: Original does the job, we always carry Protec III with us. We look at it this way, it is a good insurance program. It is easier to do something easy, such as use Protec III as a cure, than having to deal with wrecked concrete if it isn't used."

Date: April 2017

Location: Medicine Hat, Alberta

ANDERSON CONSTRUCTION

GENERAL CONTRACTOR

COMPANY PROFILE:

Anderson Contracting has been providing Saskatoon and the surrounding area with skilled general contractors since 1978. We offer unmatched construction consultation services and project management for a number of different projects.

WHY IT WORKS:

Used as a cure for 10 years now- no chipped edges on our saw cuts.

"We always apply Protec III: Original as a cure on our warehouse floors. Since we started doing this, our saw cuts have nice, clean edges. Before we always had chipped edges. We have been using Protec III: Original for 9 years now as a cure and we have never had any issues from any of our floors, great product."

Date: April 2017

Location: Saskatoon, Saskatchewan

PRO-BILT STRUCTURES

JEFF - GENERAL CONTRACTOR

COMPANY PROFILE:

We are proud to introduce you to Pro-Bilt Structures Ltd. in SK. Our specialties are Design/Build and upgrading all types of metal buildings. We can include services for ground prep work, concrete pouring and finishing, plumbing, HVAC, painting, carpentry, electrical and project management.

WHY IT WORKS:

Original does not discolor or go cloudy. it is not a membrane forming cure.

Pro-Bilt is a design build company in the commercial light industrial area. We have been using Protec III: Original as a cure on our concrete floors for over 3 years now. We previously used Vo Comp 20 but we changed over because the cure and seal would stay cloudy and discolored for a long time and that did not make our floors look good. We do not have any of these issues with Protec III: Original, this product is nice to work with and the concrete even shines up with cleaning and use."

Date: 2017

Location: Kindersley, Saskatchewan

BOEHR CONSTRUCTION

DAN - GENERAL CONTRACTOR

COMPANY PROFILE:

Boehr Construction Ltd. was established in 1977. It was founded with a commitment to service, quality, workmanship, and safety. This commitment has allowed Boehr Construction to become a reputable, versatile, general contracting firm.

WHY IT WORKS:

17 years we have used Protec III to cure all our concrete - Everything has changed and life is good.

"It's been 15 years since we first started using Protec III: Original to cure all of our broom finish and power trowel concrete. Before Protec III: Original, we used to use membrane forming cure and seals. It was very frustrating, because of all the concrete popping and shaling issues. Since we have changed over to Protec III: Original, everything has changed, life is good."

Date: 2017

Location: Watrous, Saskatchewan

CARBROOK CONCRETE

KIVEN RYE - BROOM FINISH/PLACER AND FINISHER

COMPANY PROFILE:

Serving Grande Prairie and area, Carbrook Concrete specializes in residential and commercial concrete finishing.

WHY IT WORKS:

Versatile product that takes care of the concrete on multiple levels.

"I like the Protec III: Original, It works great on the concrete we have sealed. I like how your product line is very versatile. We have been using your sealers for 5 years now with no problems."

Date: 2015

Location: Grand Praire, Alberta

LG CONCRETE

BROOM FINISH/PLACER AND FINISHER

COMPANY PROFILE:

No Problems, No call backs, No issues

WHY IT WORKS:

It works because of the unique chemical reaction
Protec III: Original creates in the concrete surface.

"Protec III: Original is a really good product, it gives me peace of mind. I have no problems with my driveways. Protec III slows down the cure and increases the psi, and I don't have to worry about peeling."

Date: 2010

Location: Saskatoon, Saskatchewan

SUNSET CONCRETE

CORY PENNER - BROOM FINISH/PLACER AND FINISHER

COMPANY PROFILE:

Sunset Concrete is a family owned and operated concrete construction company serving Camrose, Alberta and surrounding areas. We provide full prep and place services.

WHY IT WORKS:

No concrete pops or call backs.

"We have been using your Protec III: Original for 2 years now and we love it! We have had no concrete pops or call backs on our Broom Finish Concrete since using Protec III: Original."

Date: 2017

Location: Camrose, Alberta

GERANSKY BROS

RYAN GERANSKY - BROOM FINISH/PLACER AND FINISHER

COMPANY PROFILE:

Geransky Bros Construction Ltd. celebrated 40 years of business in 2015! Located in Martensville they are a licensed, experienced concrete contractor specializing in residential foundations.

WHY IT WORKS:

We've cut our callbacks down to 0

"We have been using Protec III: Original on all of our broom finish driveways and garage pads for the last 2 years, and we are glad to say that we have cut our call backs down to zero, in regards to peeling and shaling issues. It's a great product and is very convenient to use.

Date: 2017

Location: Saskatoon, Saskatchewan

MUDRACK CONCRETE

DAVE - BROOM FINISH/PLACER AND FINISHER

COMPANY PROFILE:

Mudrack Concrete has a full line of equipment to facilitate a job from start to finish. From graders to back hoes to sidewalk machines to bobcats (and more), our well-trained concrete crew can tackle any job - be it sidewalks, curb & gutter, or concrete hard surface. We have laid thousands of miles in sidewalks across Alberta over decades, and offer an expertise second to none.

WHY IT WORKS:

Stops shrinkage cracking and definitely makes the concrete harder.

"Each year we pour and place at least 20,000 linear meters of curb and gutter and 20,000 sq/ meters of sidewalks in southern Alberta. We find that Protec III: Original is the best product for our concrete.

Protec III stops shrinkage cracking and definitely makes the concrete harder from our tests. We were using a white curing compound before, we did a side by side test with Protec III: Original. When I went back to see the results, the concrete under the white curing compound could still be easily scratched with your fingernail - but not with Protec III, it definitely set better and would likely hold up against rain but not so with the white curing compound.

Protec III: Original increased the hardness of concrete.

Protec III was used as a cure and then the next day we applied another coat. The next day we tried to cut the concrete, we went through a number of blades to cut the concrete, so make sure you do your saw cuts before the application of the second coat, it will be much easier on the concrete blades."

Date: April 2017

Location: Medicine Hat, Alberta

RUBICON CONSTRUCTION

PLACER AND FINISHER/POWER TROWEL

COMPANY PROFILE:

Established in 1990, and with experience in the greater Edmonton area since 1972, Rubicon Construction Ltd. is owned and totally operated by 2 partners who participate in all aspects of the Company. We are actively involved in the day-to-day management, estimating, consulting, and all on-site preparation, right to the finishing and clean-up of the entire concrete project.

WHY IT WORKS:

Does NOT plug sprayers, easy to apply.

"What we like about Protec III is it doesn't plug up the sprayers, a super treat to push through the sprayer. We have used the product for one year now so we don't know how good it works, but the indications are good so far, it is spring and we have had no call backs with the driveways we treated with Protec III, so very good news. We like the concept of the product and how it strengthens the surface of the concrete while still letting it breathe, which is very important for our concrete nowadays. We have used everything out there, and this is the most user friendly product by far and we have been doing concrete since 1972."

Date: April 2016

Location: Edmonton, Alberta

JAGEN CONSTRUCTION

BROOM FINISH/PLACER AND FINISHER

COMPANY PROFILE:

General Contractor/Placer and finishing within the Humboldt, Sk and area.

WHY IT WORKS:

We have no problems and no shrinkage cracks. We always make sure to use Protec III: Original even in the fall.

"We have been using Protec III: Original on garage slabs and broom finish concrete. We have no problems, and no shrinkage cracks.

We notice when we do 2 coats, the water noticeably sheds off the concrete.

You can't get away with not using Protec III. The one job we didn't do last fall, was the only concrete we did that popped, lesson learned.

Make sure you always protect the concrete no matter what time of year it is."

Date: April 2017

Location: Carmel, Saskatchewan

HEROLD'S CONCRETE

BROOM FINISH/PLACER AND FINISHER

COMPANY PROFILE:

Herold's concrete serving Saskatchewan in all it's concrete needs.

WHY IT WORKS:

No shale or shrinkage cracks when we use Protec III: Original

"I love this stuff, Protec III: Original. We have no shale pops or shrinkage cracks, not like we used to have with the curing compounds or cure and seals we used to use.

It also gives the concrete that blue-grey look when it is curing, like it is supposed to be."

Date: 2010

Location: Saskatchewan

LAFARGE

TERRY PETERSON - REDI MIX COMPANY

COMPANY PROFILE:

Lafarge is Canada's largest provider of diversified construction materials and a member of the global group, LafargeHolcim. With 6,000 employees and 400 sites across Canada, our mission is to provide construction solutions that build better cities and communities. From cement and aggregates, to ready-mix and precast concrete as well as asphalt, paving and construction, we have the ability to bring value to every project.

WHY IT WORKS:

No call backs, Creates a better cure.

"We Promote and sell Cornerstone Coating's Protec III: Original and the Protec III: W.H.A.M because it greatly reduces problems and call backs associated with concrete popping and shaling. Protec III: Original works very good as a cure and hardener for all of our concrete.

We are very happy to recommend these products to all of our customers"

Date: 2015

Location: Grand Praire, Alberta

LITTLES REDI-MIX

REDI MIX COMPANY

COMPANY PROFILE:

A Tradition Of Serving Our Community
With Reliable Service & Dependable Quality. with over
50 years in the industry.

WHY IT WORKS:

Put it on right away, works great as a finishing aid.

"We have been selling and using Protec III: Original since 2002 and we love this product. Protec III: Original is very versatile, we can use it on new concrete, old concrete, broom finish and power trowel. We like that it is Water-Based and very safe to use. We find that it is very easy to use on new concrete, you simply apply it after the bleed water is off. We like that we don't have to come back after 28 days of curing to apply a sealer compared to other products. This product is excellent for reducing salt and freeze thaw damage to concrete. We have 10 year old concrete driveways side to side, one with nothing on it and the other with Protec III: Original. The driveway with Protec III: Original is easily twice as good as the non-sealed driveway. We have one customer who applies a coat of this sealer every 2 years and after 8 years the driveway is in perfect condition. This sealer is affordable and we recommend it to all of our customers."

Date: 2015

Location: Tisdale, Saskatchewan

N&R CONCRETE

LOGAN - REDI MIX COMPANY

COMPANY PROFILE:

N&R Concrete is a locally owned and operated company that has proudly been serving Melville and the surrounding area for over 30 years.

WHY IT WORKS:

Results are always better when our customers use Protec III: Original on their concrete.

"We have been selling and promoting Protec III: Original for over 7 years now for concrete. Results are always better when our customers use Protec III. We recommend Protec III for all our Agriculture projects.

Date: 2016

Location: Melville, Saskatchewan

ALBERTA CONCRETE PUMPING

PAUL - REDI MIX COMPANY

COMPANY PROFILE:

Alberta Concrete Pumping Ltd. owns and operates long boom concrete pumps with boom reach up to 55 meters; and was founded in early 2004 with the objective to providing easy access to concrete pumping solutions particularly in Edmonton and surrounding areas.

WHY IT WORKS:

Protec III: Original goes into the concrete surface, and chemically reacts with the bonds in the concrete, leaving a natural finish.

We highly recommend Protec III: Original for all our concrete, it's a great product to use, not like the sodium silicates based ones.

We once had to use a sodium silicate, because it was spec'd in and we could not get it changed.

That project ended up costing us \$7,000 to clean the surface, the sealer left ugly stains all over the concrete. We had to grind the surface off and it still left an ugly stain on our concrete.

To use a sodium silicate on a warehouse floor is crazy.

Date: March, 2019

Location: Edmonton, Saskatchewan

WATROUS CONCRETE

REDI MIX COMPANY

COMPANY PROFILE:

Watrous Concrete Ltd has over 30 years of experience providing professional concrete services. We service Watrous and surrounding communities, including Colonsay, Lanigan, Strasbourg, Nokomis, Raymore, Drake, Viscount and more.

WHY IT WORKS:

Been using this Product since 2001 and we recommend it to everyone.

We have been selling Protec III: Original since 2001 and all of the contractors who use this product say it works great for protecting their concrete. Our contractors keep coming back to get this product. We recommend everyone to use Protec III: Original on all of their concrete."

Date: 2016

Location: Watrous, Saskatchewan

HOLMES REDI-MIX

REDI MIX COMPANY

COMPANY PROFILE:

Reliable service and dependable quality in Nipawin,
Carrot River and Area.

WHY IT WORKS:

You cannot use cure and seals on green concrete in
our area without the concrete popping.

"We have had very good results with Protec III: Original. You cannot use Acrylic Cure and Seals on green concrete in our area without the concrete popping. With Protec III we do not have this problem. We have been selling this product for 14 years and we have had no complaints from our customers."

Date: 2011

Location: Nipawin, Saskatchewan

CONCRETE EDGE CONSTRUCTION

ROB - REDI MIX COMPANY

COMPANY PROFILE:

Concrete Edge Construction has provided quality concrete services for government institutions, large businesses, homeowners, and general contractors.

WHY IT WORKS:

We don't warrant our concrete unless Protec III: Original is used as a cure.

"We are a Redi-Mix supply company in Kindersley, SK. Protec III is a great product, in fact we will not warranty our concrete unless Protec III: Original is used as a cure. We have been in business for 50 years now and we can say that Protec III: Original is one of the best products in the market place. Protec III: Original works great when its windy out, it stops the concrete surface from developing shrinkage cracks from drying out too fast. Protec III: Original has cut down concrete problems dramatically, membrane cures are a terrible idea for concrete, Protec III is the answer."

Date: 2017

Location: Kindersley, Saskatchewan

KAEWEST CONCRETE

KENT - PLACER AND FINISHER/POWER TROWEL

COMPANY PROFILE:

KaeWest is a premiere, comprehensive concrete contractor. We are committed to delivering outstanding client service and exceptional quality with proactive management through all phases of construction.

WHY IT WORKS:

We like that we can apply the product while we are still on site.

"We have been using Protec III: Original for over 3 years now. We like the price, we like that it is easy to use and we like that we can apply the product while we are still on site, while the floor is still clean.

We look forward to using Protec III: Original on all of our floors."

Date: April 2017

Location: Bow Island, Alberta

ROYAL CONCRETE

DAVE - PLACER AND FINISHER/POWER TROWEL

COMPANY PROFILE:

Royal Canadian Concrete has offered many concrete services to Edmonton and surrounding areas. With our 25 years of experience we are happy to work with you to create your dream patios, driveway or side walk!

WHY IT WORKS:

We use it on all our power trowel concrete with virtually no issues on the concrete surface.

"We have been using Protec III: Original as a cure for 8 years now, on all our Power Trowel concrete. Compared to acrylic cure and seals, we virtually have no issues with the concrete surface. Since using Protec III: Original, we could not say the same thing with cure and seals. There are a lot of benefits to using Protec III: Original, it's food safe, has no smell, you don't have to come back 28 days later and best of all, it works."

Date: 2017

Location: Saskatoon, Saskatchewan

CONCRETE IMAGE

PLACER AND FINISHER/POWER TROWEL

COMPANY PROFILE:

We are a Professional Concrete Placing and Finishing Company with services covering all aspects of Interior and Exterior Concrete Slabs. With 17 years+ of experience, our team specializes in slab on grade, slab on void, slab on steel deck, and structural suspended slab work, with concrete finishes from steel trowel, exposed aggregate, broom, and stamped concrete.

WHY IT WORKS:

Works great where flooring goes down. does not interfere with adhesives and glues.

"We have been using Protec III: Original for over 4 years now as a cure and we love it! We put it on right after we do our final trowel so we don't have to come back later. If we cut, we do it the next morning. We will first chalk our lines, spray on the Protec III and let it dry. Usually one hour later we will cut the lines. We have treated over 1 million ft² so far in the last 4 years with no problems. When we use Protec III we have never had a call back or deficiency because of the product, for this reason we push this product everywhere we can, this product should be used everywhere. Protec III works great where flooring goes down because it is a penetrant and leaves no membrane."

Date: 2016

Location: Regina, Saskatchewan

BRY SAND CONCRETE

NATHAN CALVERT- PLACER AND FINISHER/POWER TROWEL

COMPANY PROFILE:

Bry Sand is family owned and operated company, founded by Bryan Trusty.

When it comes to ice arena floors and specialty concrete, Bry Sand is the company of choice by some of the biggest names in the industry, including PCL, Lafarge and Stuart Olson. Today, Bryan plays an active operations role within the company. Chances are, you'll deal with Bryan at least once during the planning or construction phase of your project.

WHY IT WORKS:

No craze or spider cracking when using Protec III:
Original

"What we like about Protec III: Original is the ease of application, not like other cures on the market. We apply the product and leave, very simple. We have been using Protec III: Original as a cure for over 2 years now, we have never had a problem, and no call backs when using Protec III: Original. When we apply the Protec III after the final trowel we have no craze or spider cracking. We use Protec for areas where flooring is to be installed, because it leaves no membrane. The product does not interfere with the adhesion of the flooring. Great Product!"

Date: 2016

Location: Edmonton, Alberta

3D CONCRETE

GREG - PLACER AND FINISHER/POWER TROWEL

COMPANY PROFILE:

At 3D Concrete, we have been forming and pouring concrete footings, walls and floors for over 23 years. We specialize in a variety of products and techniques.

WHY IT WORKS:

Keeps the Concrete cool in hot temperatures, providing a better cure.

This is the first year using Protec III: Original and we've been loving it. We use it on all of our interior and exterior concrete, it works great for curing.

We used it on very hot days and it's keeping the concrete nice and dark.

We also use it for grinding and polishing and it works great there as well.

Date: 2019

Location: Creston, British Columbia

CALIBER CONCRETE

CARMAN - PLACER AND FINISHER/POWER TROWEL

COMPANY PROFILE:

Calibre Concrete paves the way for a hassle-free experience. And a smoother project means a more profitable project. Through consistently reliable concrete forms, expert project management and even insightful troubleshooting, we deliver value of the highest calibre.

WHY IT WORKS:

Absolutely stops surface cracking.

"Using Protec III: Original absolutely stops surface concrete cracking on windy days, which is pretty much all the time. Protec III is an amazing product. We have been using it for 10 years now. We always have a pail in our truck, we never leave home without it.

On broom finish concrete, when it is windy, we just spray Protec III: Original on, then steel it in. Protec III: Original works great as a retarder, extremely effective compared to Confilm. I don't have to worry about my broom finish concrete anymore.

For power trowel concrete in order to get an extremely hard floor, we always spray on a mist coat before our final trowel and trowel it in. On the final pass of the power trowel, we spray on a cure coat of Protec III: Original and by doing this process you get this amazing, extremely hard floor. Great product, Great results."

Date: April 2017

Location: Swift Current, Saskatchewan

RELIABLE EXCAVATING

CURTIS KRETZ- CITIES & OWNERS

COMPANY PROFILE:

Reliable excavating is an independently owned business, specializing in gravel, road repair and trenching.

WHY IT WORKS:

Shop floor looks brand new!

"I treated my shop floor with Protec III: Original when it was newly poured. I have had no chipping, no cracking, no spalling. It looks brand new! Protec III did a really great job. When snow melts on the concrete, I can just sweep it away and the concrete lightens up right away. Great product!"

Date: 2017

Location: Bruno, Saskatchewan

CASTLE BUILDING CENTRE

MELODY - CITIES & OWNERS

COMPANY PROFILE:

Contractors and do-it-yourselfers in Kindersley and surrounding area of Saskatchewan, talk to us about your building and renovation projects. We're Richard and Melody, and we have over 50 years of combined experience!

WHY IT WORKS:

Great looking polished floor with great savings.

"Protec III: Original was used as a cure by Royal Concrete when they placed and finished our floor for our new building in our retail space. We wanted a polished concrete floor without paying the high cost of the concrete polishing people. Murray from Cornerstone Coatings said that if we applied one coat of the Protec III: Original for polishing concrete, with use and cleaning with our floor scrubbers, that the floor would polish up without all the expense. It has been 10 months since our grand opening and the floor looks beautiful, it was a short time before a shine started to develop. Normally we have the floor cleaned one or twice a week, using water and a little soap and a standard red pad on the walk behind scrubber and we now have this beautiful polished concrete floor. Great Product, we recommend it to everyone who wants a great looking inexpensive polished concrete floor. This floor is easy to take care of and looks great."

Date: 2017

Location: Kindersley, Saskatchewan

RENT-IT STORE

DOUG MITCHELL - CITIES & OWNERS

COMPANY PROFILE:

Our staff prides itself on great customer service and knowledge of the products we rent and sell. With 150 years combined experience, we are second to none in the rental industry in Saskatchewan.

WHY IT WORKS:

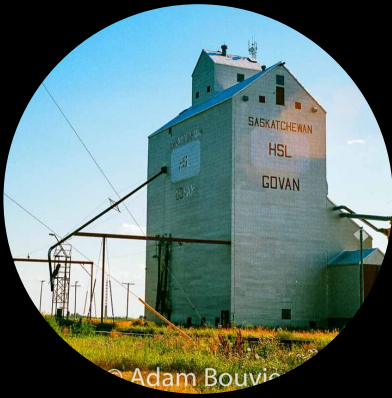

The floor remains non-slip when wet.

"Protec III: Original was used to polish our concrete floor at the Rent-it Store in Saskatoon, SK.

We are pleased with the results, this is a very good product. The floor was polished to a 1500 grit and it still remained non-slip when wet. The floor is also very easy to keep clean."

Date: 2006

Location: Saskatoon, Saskatchewan

TOWN OF GOVEN

MICHELE CRUISE-PRATCHLER - CITIES & OWNERS

COMPANY PROFILE:

Govan is a town in the province of Saskatchewan, Canada located 111 kilometres north of Regina on Highway 20.

WHY IT WORKS:

We halted any further deterioration of our concrete by using Protec III: Original.

"Our sidewalks in the town of Govan have been poured in 1999 and due to a number of factors, had rapidly deteriorated. The application of Protec III has been very successful in halting any further deterioration of the sidewalks. Since this sealant has been applied, the condition of the sidewalks have not gotten any worse, even following the winter months during which a significant amount of ice melting products were required to be applied due to freezing rain and other environmental conditions that caused extremely icy conditions. We are very pleased with the results of Protec III. The investment in the application of this sealant has proven to save us a great expense that would have incurred had the sidewalks continued to deteriorate and required replacement."

Date: 2006

Location: Goven, Saskatchewan

GRANDWEST ENTERPRISES

ISSAIC HIEBERT - CITIES & OWNERS

COMPANY PROFILE:

Grandwest Enterprises is the largest wholesale distributor of automotive and truck accessories in Canada and has been providing exceptional service to their customers for 38 years.

WHY IT WORKS:

Absolutely no maintenance on these floors.

"We will definitely look at using Protec III: Original again on our next expansion. Protec III: Original has absolutely no maintenance to the finish, only periodic sweeping to keep it clean. The floor is shiny, the concrete no longer dusts, the product makes the concrete reflect light extremely well, and it is easy to keep clean.

Date: 2010

Location: Saskatoon, Saskatchewan

MOSIAC ARENA

CITIES & OWNERS

COMPANY PROFILE:

Mosaic Arena and multi-plex was built in 2017 with seating of over 5000 capacity.

WHY IT WORKS:

Pop/soda spills can sit on the floor for up to 2 days before clean-up with Protec III: Original the floors hold up great.

"Super easy floor to take care of, Protec III has kept our cleaning cost down compared to other facilities in Moose Jaw that have concrete floors. \$1,000 for us compared to up to \$10,000 for other facilities like ours. Its also been holding up to soda pop spills and we get a lot of pop spilled on these arena floors. The spill can sometimes sit on the concrete for up to 2 days before it is cleaned up. We are really happy with the concrete floor, I was really concerned about how a concrete floor would hold up under these conditions, but it has held up well. It has been over 6 years now since we opened in August 2011.

A beautiful product."

TRI-WAYS DISPOSAL

CITIES & OWNERS

COMPANY PROFILE:

Triways Disposal Services (2009) Ltd is Saskatchewan owned and operated. The company is based in Swift Current and provides waste and recycling services to customers in the City of Swift Current and surrounding region.

WHY IT WORKS:

It has been 3 years now and we wished we had done this to all our floors.

We had Caliber Concrete do our concrete in our wash bays. They used Protec III: Original as a cure and then applied Dual Tech 28 days later. In the wash bays, we clean the outside and wash down the inside of the disposal trucks everyday and the product is keeping the concrete looking new. It has been 2 years now and we wished we had done this to all of our floors. It is an inexpensive product and makes a huge difference for us."
